

Passware Kit Device Decryption Add-on

Passware Kit Device Decryption Add-on is an advanced forensic tool that allows users to unlock, decrypt, and recover passwords or recovery keys for: Western Digital My Passport and My Book, Transcend, Seagate and LaCie disks, Lenovo ThinkPads, BitLocker-encrypted devices with TPM, and Macs with Apple T2 Security Chips.

Note: the Add-on is available for law enforcement and other types of government organizations and private companies with justifiable business needs, such as forensic firms or corporate investigation teams.

Hardware Decryption in Minutes

🍏 T2 Macs with Apple T2 Security Chips

Recovers passwords for all Macs with Apple T2 Security Chips and decrypts APFS images. As the brute-force attack is performed on the Apple T2 Chip of the target Mac, the average password recovery speed is 10–20 passwords per second.

Supported Apple Devices

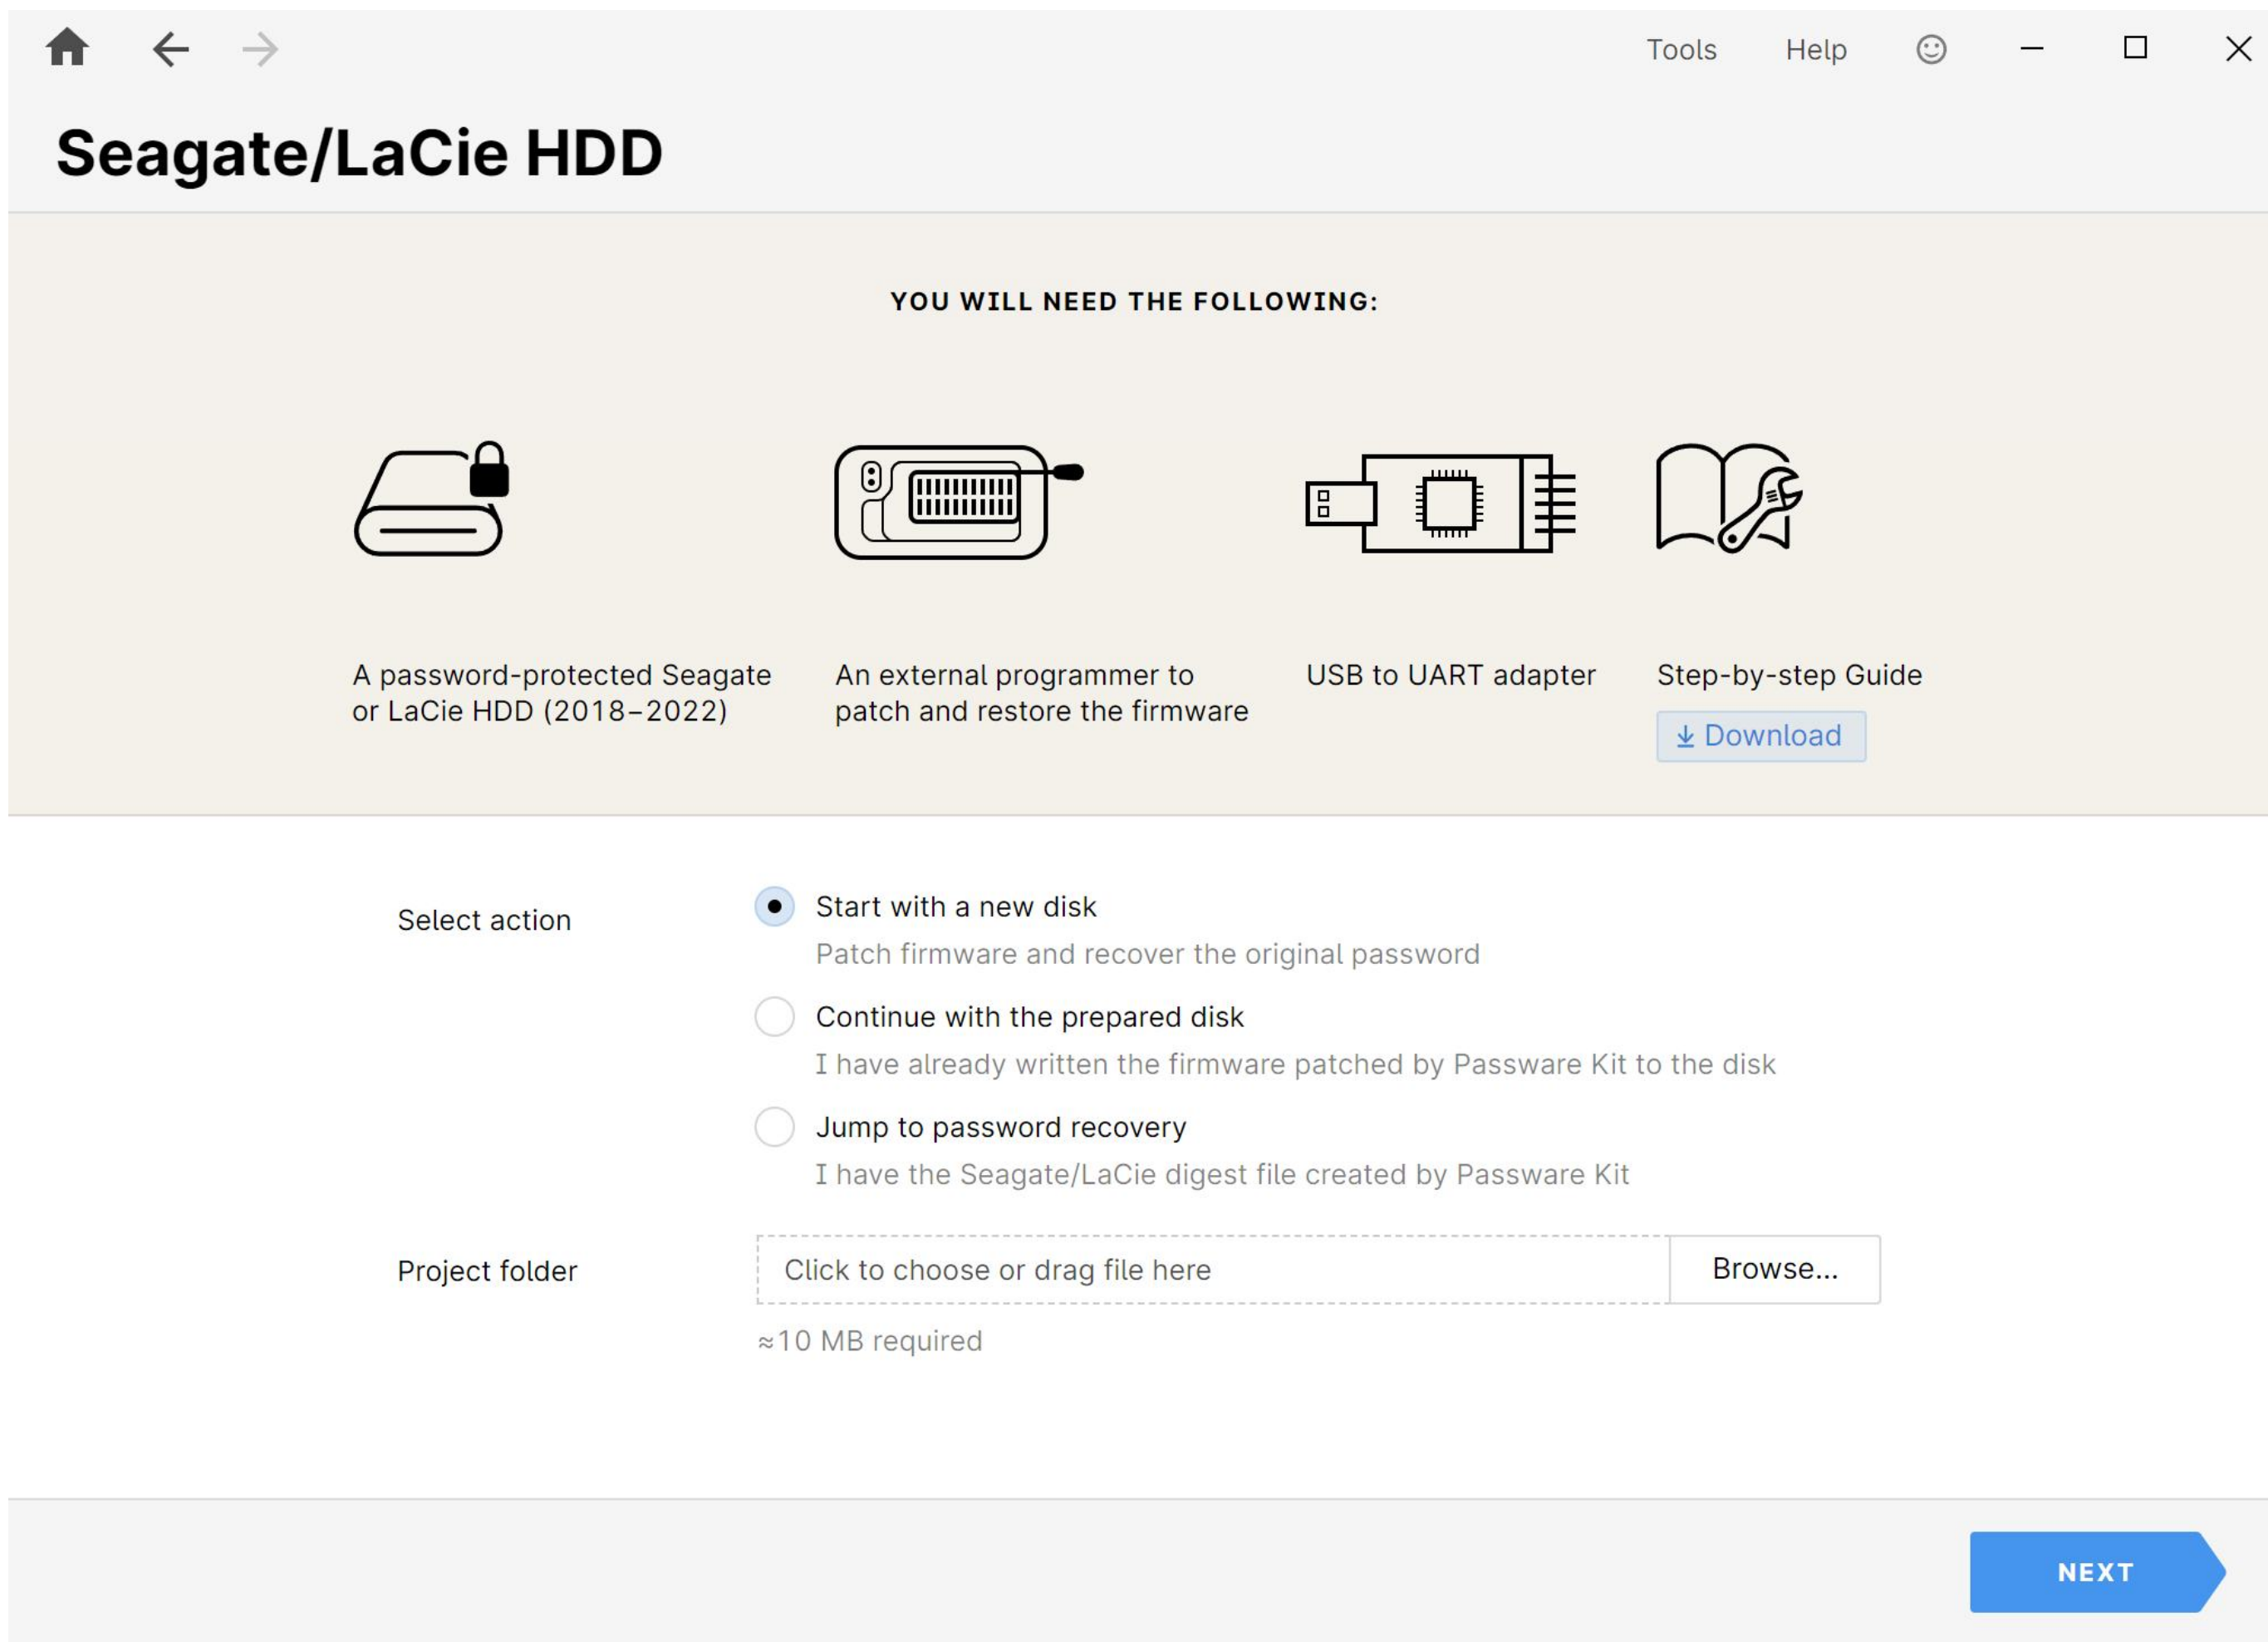

- MacBook Pro 2018-2020
- iMac Pro/Retina 5K 2019-2020
- Mac mini 2018
- MacBook Air Retina 2018-2020
- iMac (Retina 5K, 27-inch, 2020)
- iMac Pro
- Mac Pro (2019)
- Mac Pro (Rack, 2019)
- Mac mini (2018)
- MacBook Air (Retina, 13-inch, 2020)
- MacBook Air (Retina, 13-inch, 2019)
- MacBook Air (Retina, 13-inch, 2018)

Requirements

- The latest version of Passware Kit Ultimate or Passware Kit Forensic for Windows or Mac
- Image of the target Mac (can be acquired in “Target Disk Mode” using any forensic tool)
- Target Mac connected using a USB-C/Thunderbolt cable during the password recovery process

Supported macOS Versions

- Tahoe
- Sequoia
- Sonoma
- Ventura
- Monterey
- Big Sur
- Catalina
- Mojave

Seagate and LaCie Disks

Recovers passwords for Seagate and LaCie hard disk drives. The average speed is 6,500 passwords per second on NVIDIA RTX 4070 Ti.

Supported Devices

- All models of 2018—2022 production years

Regardless of

- Admin or user accounts

Western Digital Disks

Unlocks or decrypts WD My Book and My Passport HDD and recovers their original protection passwords. Password recovery for WD disks can be accelerated on GPU reaching the speed of 7,600,000 passwords per second on NVIDIA GeForce RTX 4070 Ti. The disk can be disconnected during the password recovery process.

Supported Devices

- My Book 2021–2024 4TB/6TB
- My Passport 2014–2024 with built-in 256-bit AES hardware encryption

BitLocker-encrypted Devices

Decrypts TPM-protected BitLocker devices in just minutes by acquiring the VMK using data stored in the TPM chip.

Benefits

- Broad device compatibility
- Easy to use — only one USB stick required
- Recovers BitLocker PIN if needed

Requirements

- Boots to the Windows login screen
- x64 system
- USB boot enabled in BIOS

Lenovo ThinkPads and computers with AMD Zen CPU

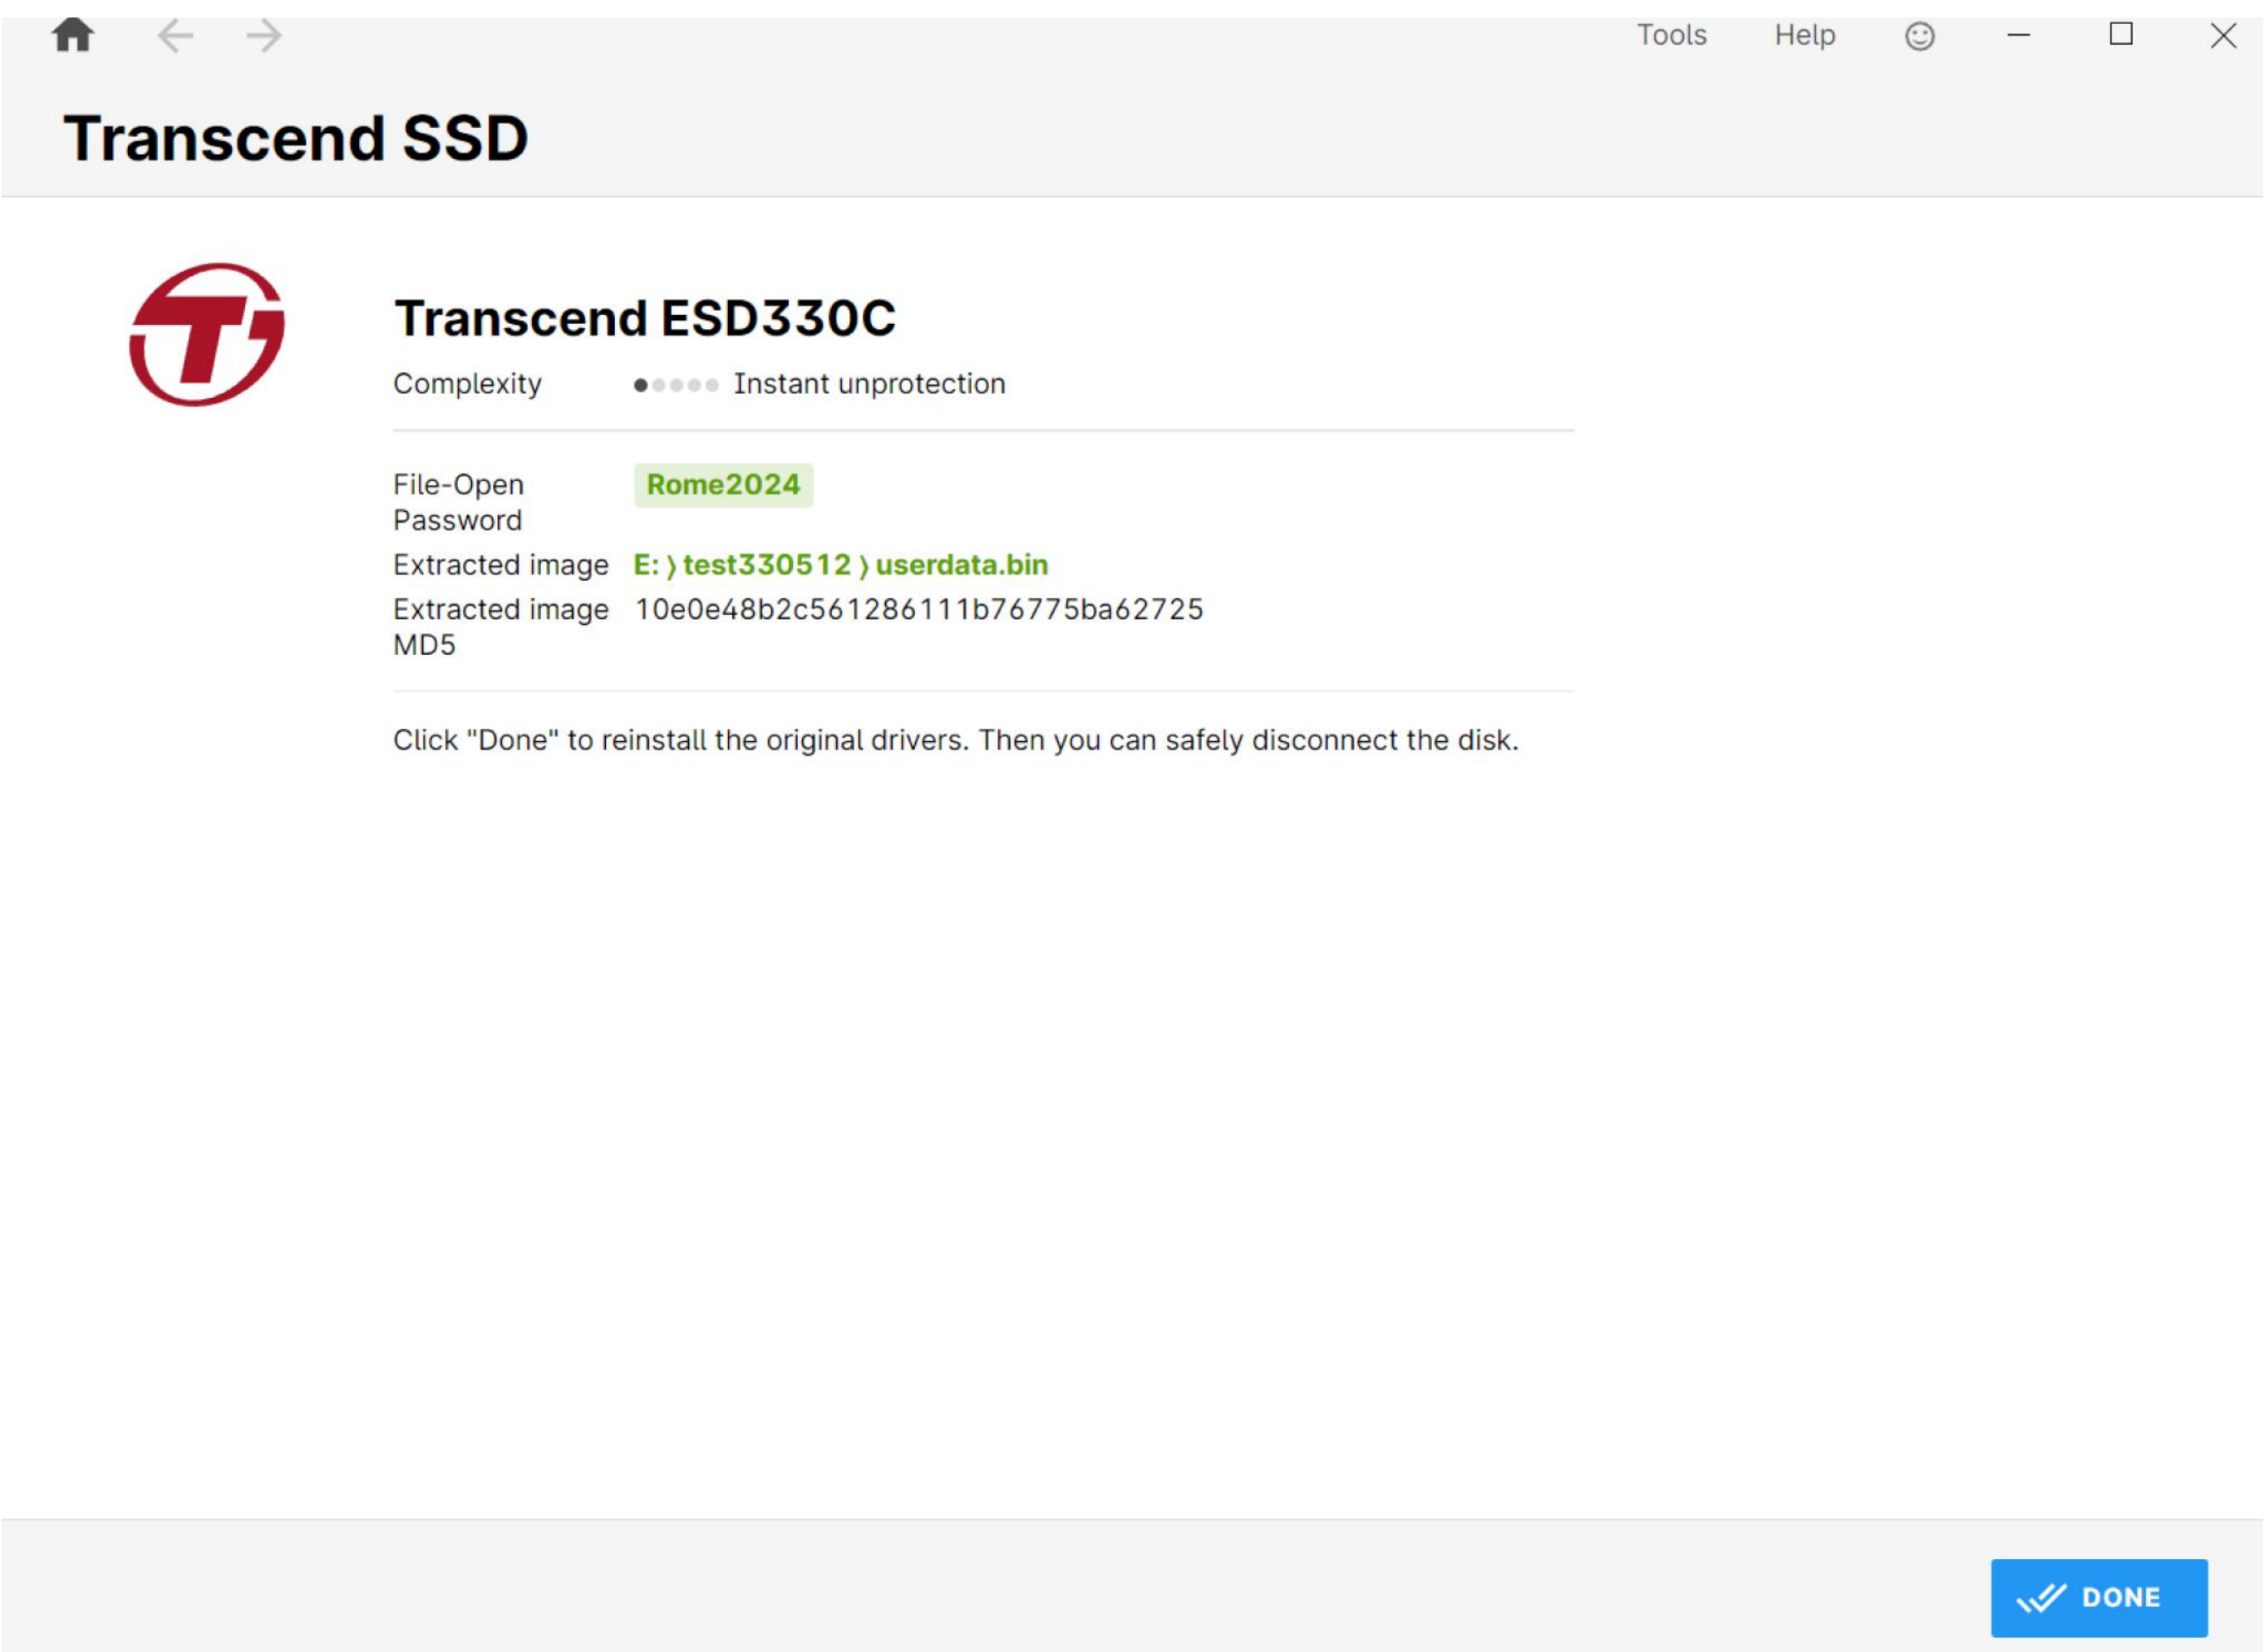

Decrypts BitLocker-encrypted Lenovo ThinkPads with TPM 2.0 and desktop computers with AMD Zen/Zen+ CPUs protected with BitLocker and fTPM. It acquires the BitLocker VMK, allowing users to decrypt the volume and retrieve the Recovery key.

Supported Devices

- Lenovo ThinkPad E, L, X, P, T (2016-2020) with BitLocker TPM 2.0
- AMD processor families: Summit Ridge, Whitehaven, Colfax, Pinnacle Ridge with fTPM

Regardless of

- Windows OS, Windows account passwords, Windows Hello protection
- Tamper protection: for Lenovo ThinkPads
- BitLocker PIN: for AMD-based computers, PIN recovery is possible before decryption

Transcend SSDs

Instantly recovers passwords and creates images of the unlocked Transcend Portable SSDs.

Supported Devices

- Models 2022–2025 with the SM2320 controller

Regardless of

- Password complexity

Requirements

- The device is in working condition
